

Steven B. Lipner
Senior Director of Security Engineering Strategy, Trustworthy Computing Security
Microsoft Corp.

Steven B. Lipner is senior director of Security Engineering Strategy at Microsoft Corp where he is responsible for developing programs that provide improved product security to Microsoft customers. Lipner leads Microsoft's Security Development Lifecycle (SDL) team and is responsible for the definition of Microsoft's SDL and for programs to make the SDL available to organizations beyond Microsoft. Lipner is also responsible for Microsoft's corporate strategies related to government security evaluation of Microsoft products.

Lipner has more than 35 years experience as a researcher, development manager and general manager in IT security. He is coauthor with Michael Howard of [The Security Development Lifecycle](#) (Microsoft Press, 2006) and is named as inventor on twelve U.S. patents in the field of computer and network security. He holds B.S. and M.S. degrees from the Massachusetts Institute of Technology and attended the Harvard Business School's Program for Management Development.
